Complete with dip-switch with 8 positions for selection of the desired user code. Door-entry phone for use in mixed audio/video Simplebus 1 and Simplebus 2 systems or in Simplebus KITS. Intercom function (to devices with the same address) in kit and Simplebustop systems. Fitted with distribution terminal art. 1214/2C. It is compatible with all SBTOP functions and products. Allows direct intercommunication between users with the same address (without the aid of an interface or porter switchboard), separate call to main switchboard, secondary switchboard and guardian door-entry phone. Colour: black. Dimensions: 90x160x28 mm.

Three responses to the need for convenience.

The basic model, featuring full visit management functionality, is also available as an integrated VIP variant with a further five customisable commands; this model can be connected to the Comelit ViP (Internet Protocol) system for simultaneous intercommunication, multiconversation, transmission of alarm signals to the porter switchboard, transferral of visit messages to a PC or telephone and call melody adjustment. The third version features Magnetic Induction (T-COIL) and is designed for anyone with hearing problems: Easycom uses this function to transmit audio signals to the hearing aid and to amplify voice communication (T-COIL).

Easycom

Simple, functional, technological.

The Easycom wall-mounted door-entry phone from Comelit is a highly-evolved product, as it occupies a minimal amount of space and is easy to use. Its linear shape, positioned vertically, means the appliance can even be installed in areas where space is limited; both white and black versions feature an elegant silver frame, integrating perfectly into any domestic environment, while the blue backlighting effect behind the keys gives the product a modern feel.

For a trendy lifestyle in every domestic environment.

Functionality in its most evolved form. Easycom offers all the functions you need for convenient and quick hands-free communication. With just a few controls, you can respond to visitors, open doors or gates, adjust audio and ringtone volume, and avoid unwanted disturbances by using the privacy key, which disables the call ringtone.

Furthermore, Easycom offers various programmable functions such as the switchboard call, intercom, secondary opening and driveway gate options or even light activation in communal areas.
